

TRANSMISSION CORPORATION OF TELANGANA LIMITED

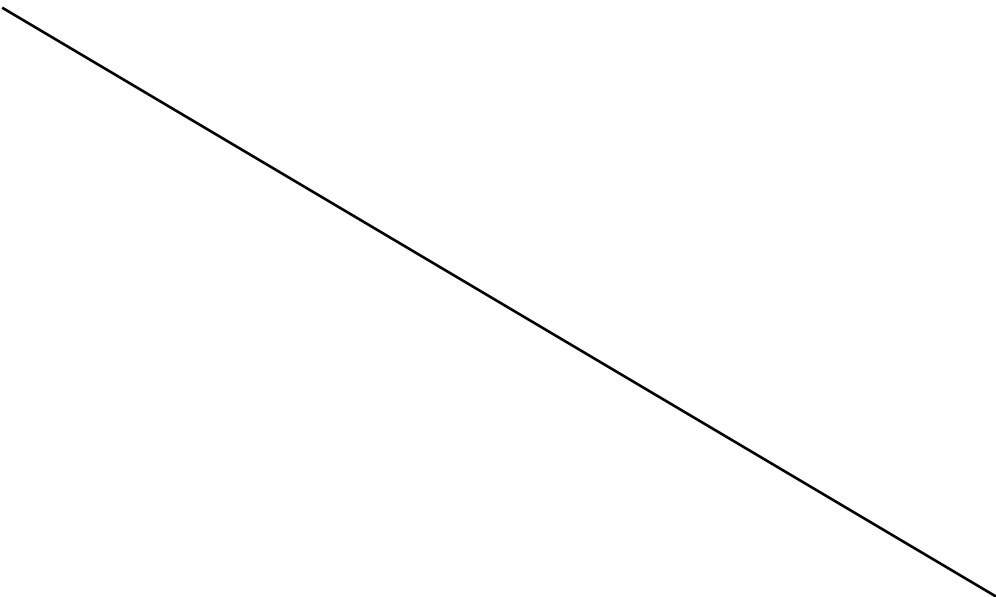

Sub: Application for new/additional 33kV and above 33kV loads through on-line portal and processing of approvals through the SAP ERP System — Orders Issued.

TOO: (CE/IT). Ms. No.1934

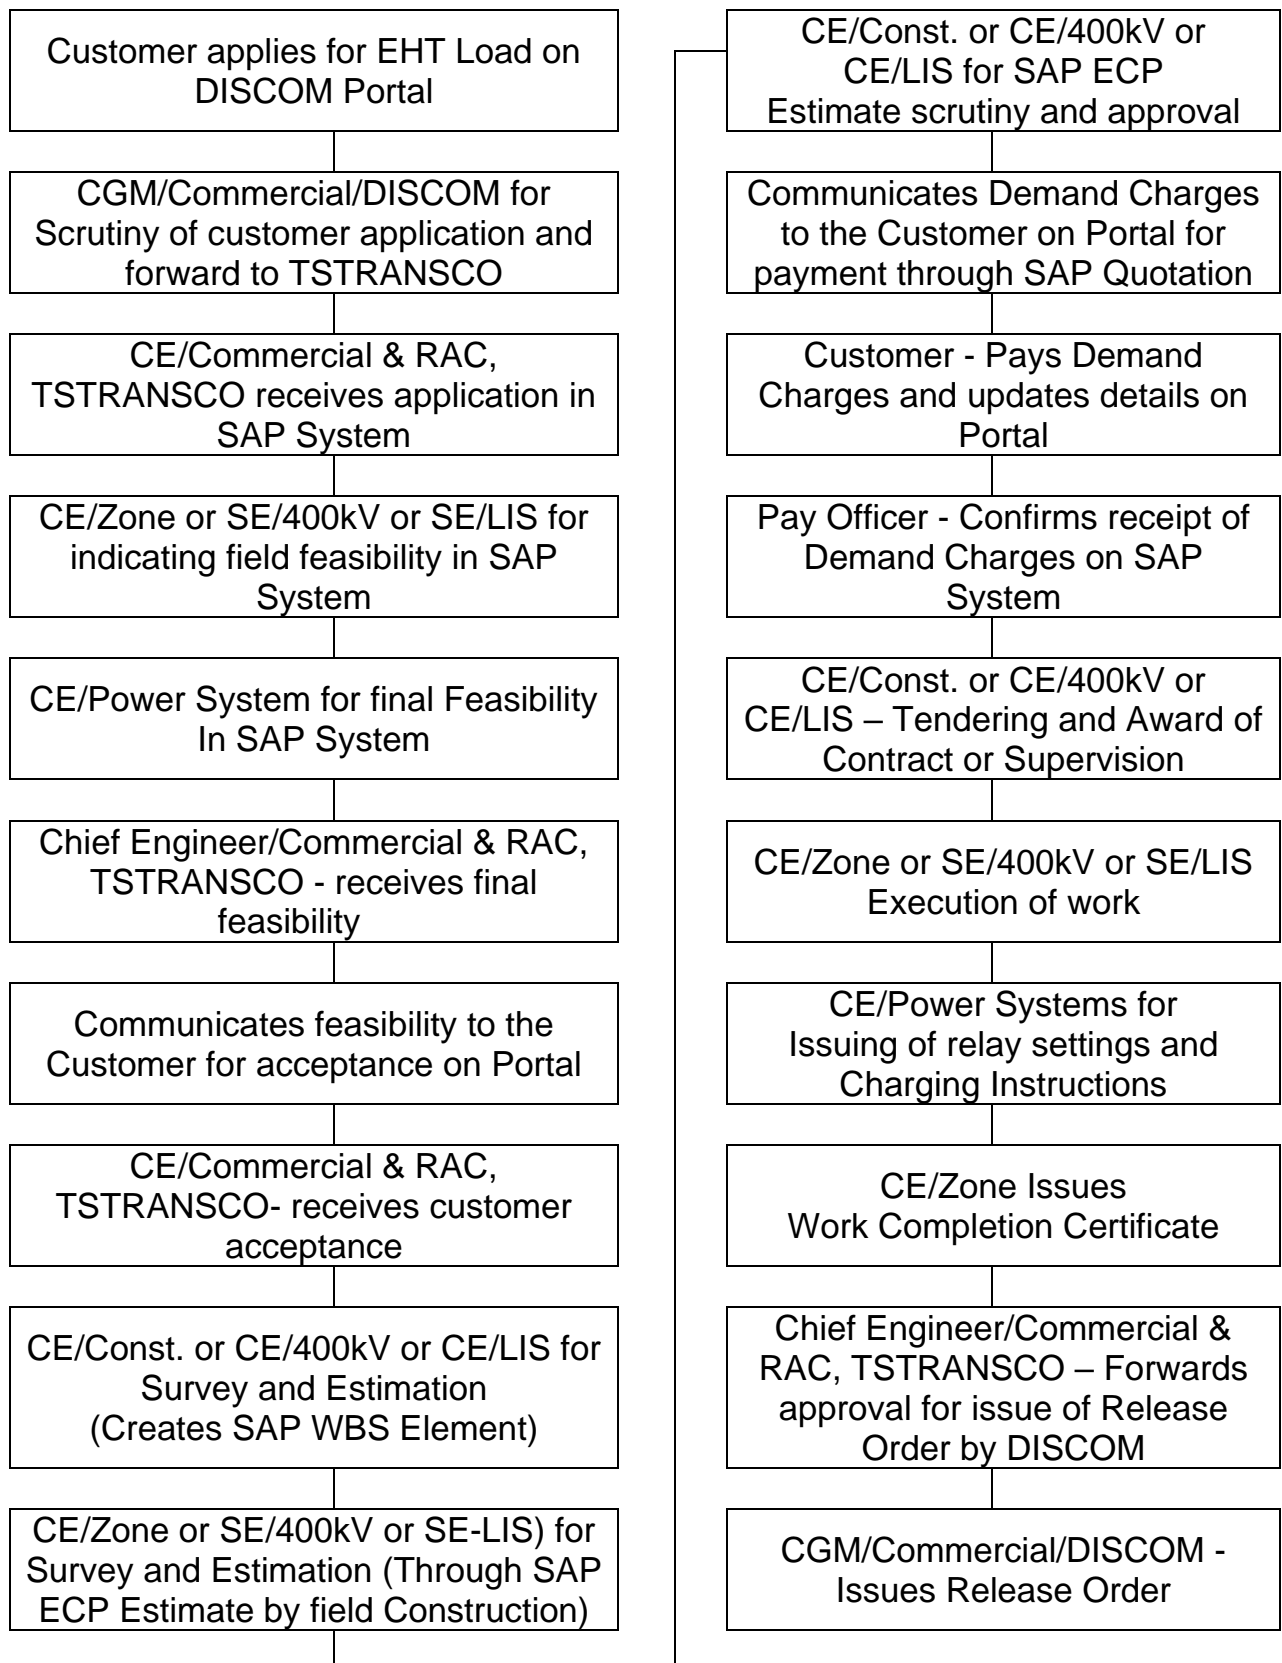

Date: 16/03/2024

1. Developments are made for application of new and additional loads at 33kV and above 33kV voltages through DISCOM Portals and for processing of approvals through the SAP ERP System. The software driven process envisages tracking of the approval processes between DISCOM and TSTRANSCO at various stages.
2. Customer shall apply for new/additional loads at 33kV and above 33kV voltages only through the TSSPDCL/TSNPDCL Portals and the same will be forwarded to the TSTRANSCO SAP ERP System by the CGM/Commercial of the concerned DISCOM after scrutiny of documents and duly ensuring the eligibility of the customer for receiving supply for the requested Load and Voltage level and as per applicable regulatory criteria.
3. Processing of applications for new/additional loads through Portal through the SAP System is mapped with following process changes to streamline and maintain uniformity across different load scenarios as far as possible:
 - a) For 132kV and above loads field Chief Engineer/Zone will be forwarding the feasibility directly to Chief Engineer/PS through SAP instead of routing through Chief Engineer/Commercial & RAC.
 - b) Concerned Chief Engineer (Construction/400kV/LIS/Transmission) will route the scrutinized SAP estimates and SAP Quotation (Demand Notice) at the time of note approval through the Chief Engineer/Commercial & RAC

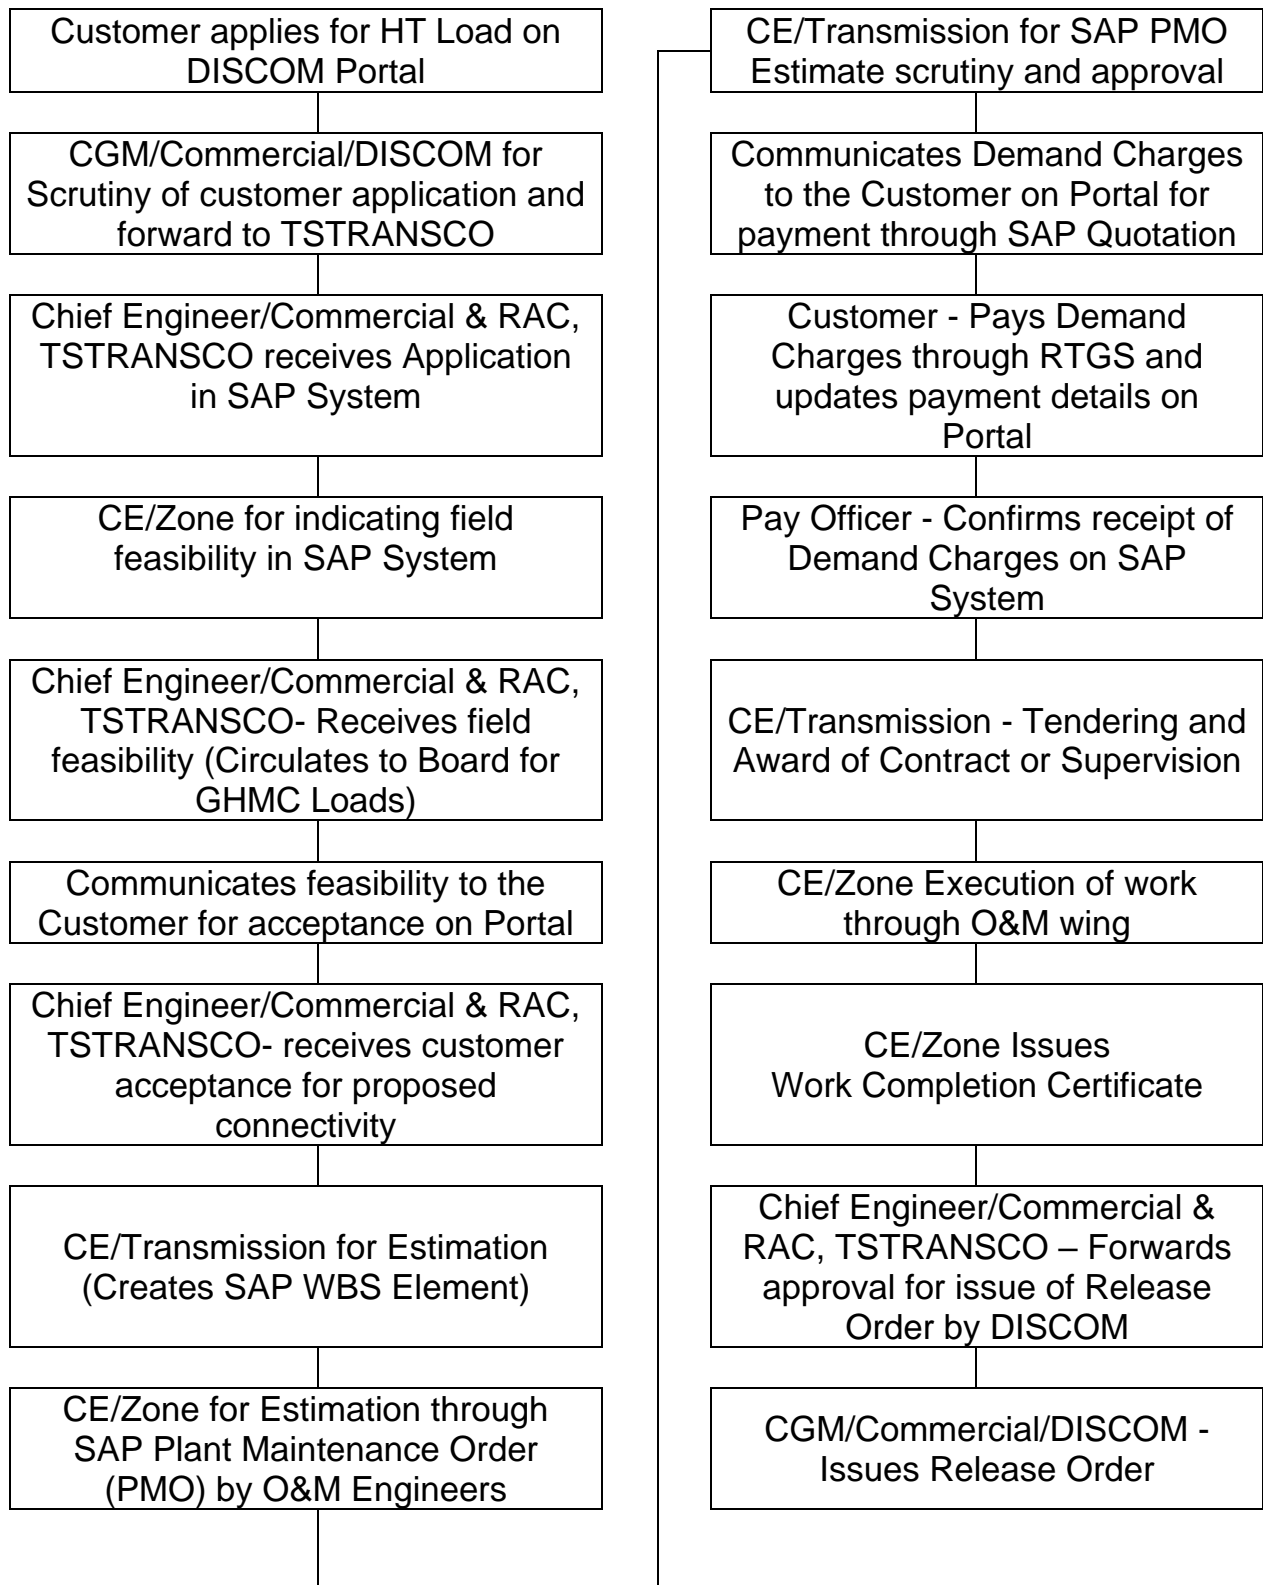

(only hard copy) for vetting of development charges and then to the Executive Director/Finance for vetting of estimate and Demand Notice.

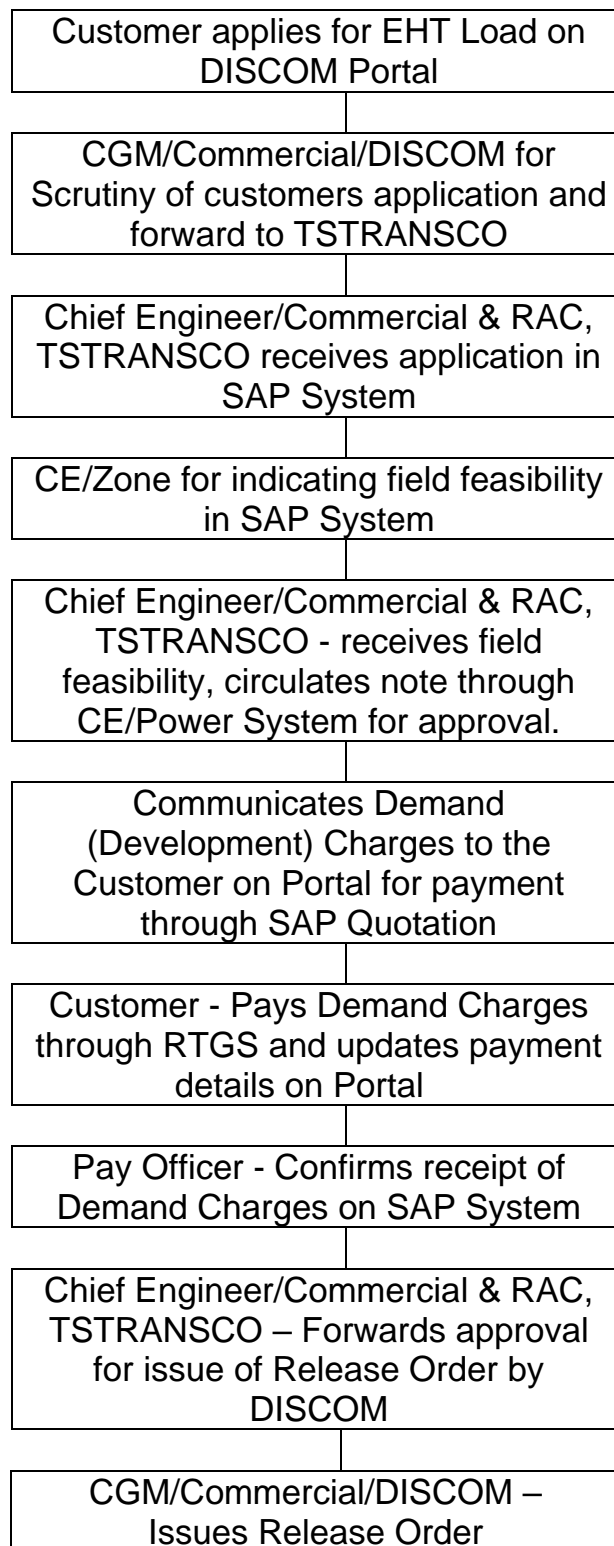

- c) For new 33kV loads, application from CGM/Commercial/DISCOM to be sent to CE/Commercial & RAC/TSTRANSCO instead of directly to the concerned Chief Engineer/ Zone for field feasibility.
 - d) For new 33kV loads within GHMC, file circulation for Board's approval is to be done by Chief Engineer/Commercial & RAC/TSTRANSCO instead of Chief Engineer/Transmission.
 - e) All payments for 33kV loads to be made to Pay Officer (VS) through RTGS instead of field Pay Units.
4. The following workflow is proposed from the point of submission of application by the Customer on the DISCOM Portal until final release of the Load to the Customer by the DISCOMs in each of the following cases:
- A. 132kV, 220kV and 400kV new Bulk Loads including LIS Loads
 - B. 33kV New Bulk Loads
 - C. Additional Load for the existing 132kV, 220kV and 400kV Loads.
 - D. Additional Load for the existing 33kV Loads
- 

A. New 132kV, 220kV and 400kV Loads:

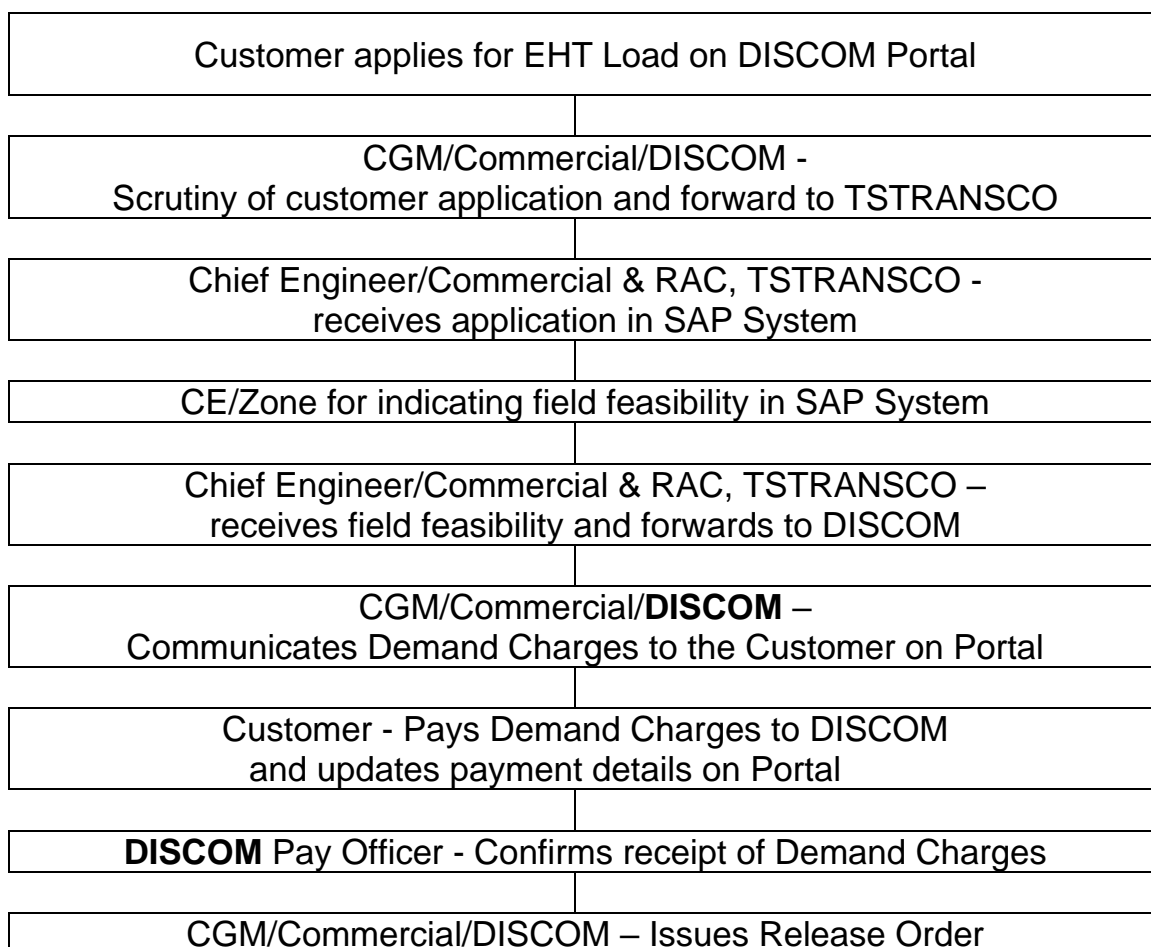

B. New 33kV Loads:

C. Additional Load for the existing 132kV and 220kV Loads.

D. Additional Load for existing 33kV Loads.

5. These orders are effective from the date of Go-Live of the online application i.e., 04/03/2024. Processing of applications received off-line before 04/03/2024 and which are in various stages of approval shall be completed expeditiously as per the procedures in vogue until 04/03/2024.
6. **These Orders are issued with the approval of the Chairman and Managing Director vide No. 346 dated 13/03/2024.**
7. These Orders are also available on TSTRANSCO website and can be accessed at the address <http://www.tstransco.in>
